ClauseBase is legal drafting software built by lawyers, for lawyers. It enables the creation of bespoke contracts in a matter of minutes, allowing lawyers to focus on actual legal reasoning and providing strategic value.

- Clauses act as intelligent building blocks that can be stacked on top of each other.
- Consistency and coherence regarding terminology, grammar, styling, language, cross-references, definitions, legal nuance, etc.
- Add legal intelligence to clauses (e.g., legal domain, formality, length, obligation strength, etc.).
- Powerful search functionalities to find the perfect clause for the perfect situation.

Dynamic drafting

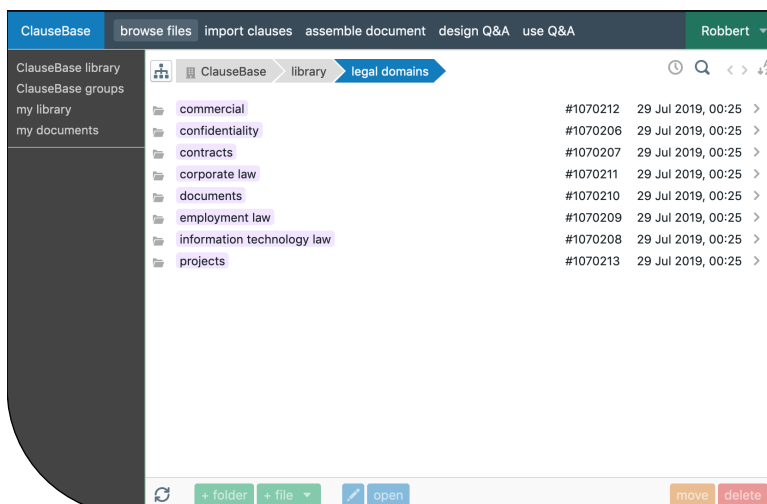

Consistent styling across all contracts

Easy automation via Q&A

Knowledge management

- Directly connect associates with your firm's wealth of accumulated knowledge to ensure quality and compliant drafting.
- Centrally manage clauses, with changes flowing through all documents that make use of them, for efficient template creation and management.
- Automatically enforce contractual house style.

## Innovate your service delivery

- Collaborate with your clients in new and innovative ways by streamlining the contract creation process.
- Generate revenue by making intelligent clauses available to clients.
- Create branded client portals, self-service portals, clause subscription packages, and much more.
- Automatically apply your client's personal house style at the click of a button.

## No technical expertise required

Other legal drafting software requires extensive involvement of IT departments – not only to install the software, but also to actually create documents.

ClauseBase is secure, cloud-based software that does not require any installation or other dependence on IT experts. Training is only necessary for those lawyers who will create new clauses, and this training is given by lawyers.

Our legal consultants are at your disposal if you require additional guidance when drafting clauses or organising your legal content.
